

2012 Engineering Fair
Saturday February 11, 2012
Museum of Flight, Seattle

The Puget Sound Engineering Council (PSEC) hosts the Engineering Fair in collaboration with the local chapters of engineering societies, businesses, colleges, and universities. This is an annual event that occurs during National Engineers Week. The E-Fair has about 20 display booths, staffed by practicing engineers and technical people representing many types of engineering disciplines. In addition, the Fair also features The Popsicle Stick Bridge Load Competition sponsored by ASCE.

The E-Fair provides a fun, visible way to see and hear about the various types of engineering disciplines, as well as encourage students to think about engineering as a career. The target audience for the event is primary and secondary school K-12 students and their parents who are interested in learning about the art and science of engineering.

As a member society of PSEC, SAME will sponsor a booth and -- we need volunteers and interactive displays that can engage the target audience. Setup is at 9:30 am, and teardown at 4:00 pm. We try to get enough volunteers so that booth time is about 2 hours. **To volunteer or provide booth ideas, please contact Joe Souther at (425) 519-8300 or southerjt@cdm.com.**
